

# SECURITY ADVANCED

# THE INFOSEC WHEEL

# Infosec is not a separate field, but a process

We already knew **red**- & **blue** teams, but cooperation & integration need to go further!

Red attacks, Blue defends, but who implements the fixes?

@proxyblue

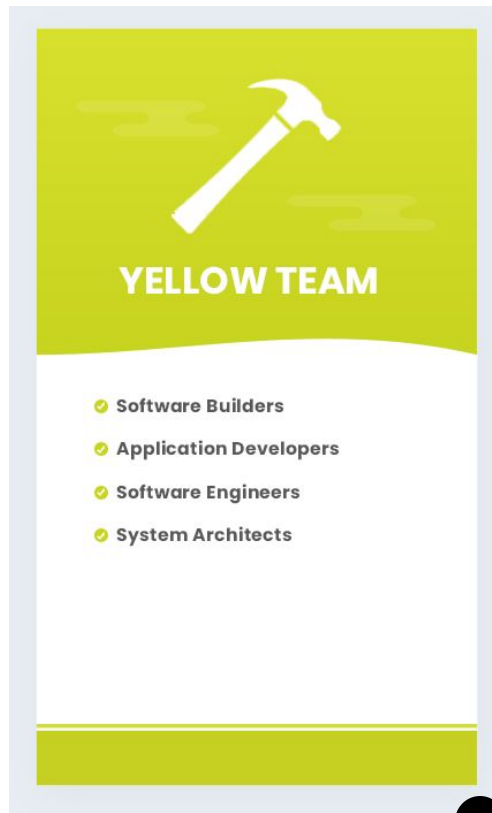

# YELLOW TEAM

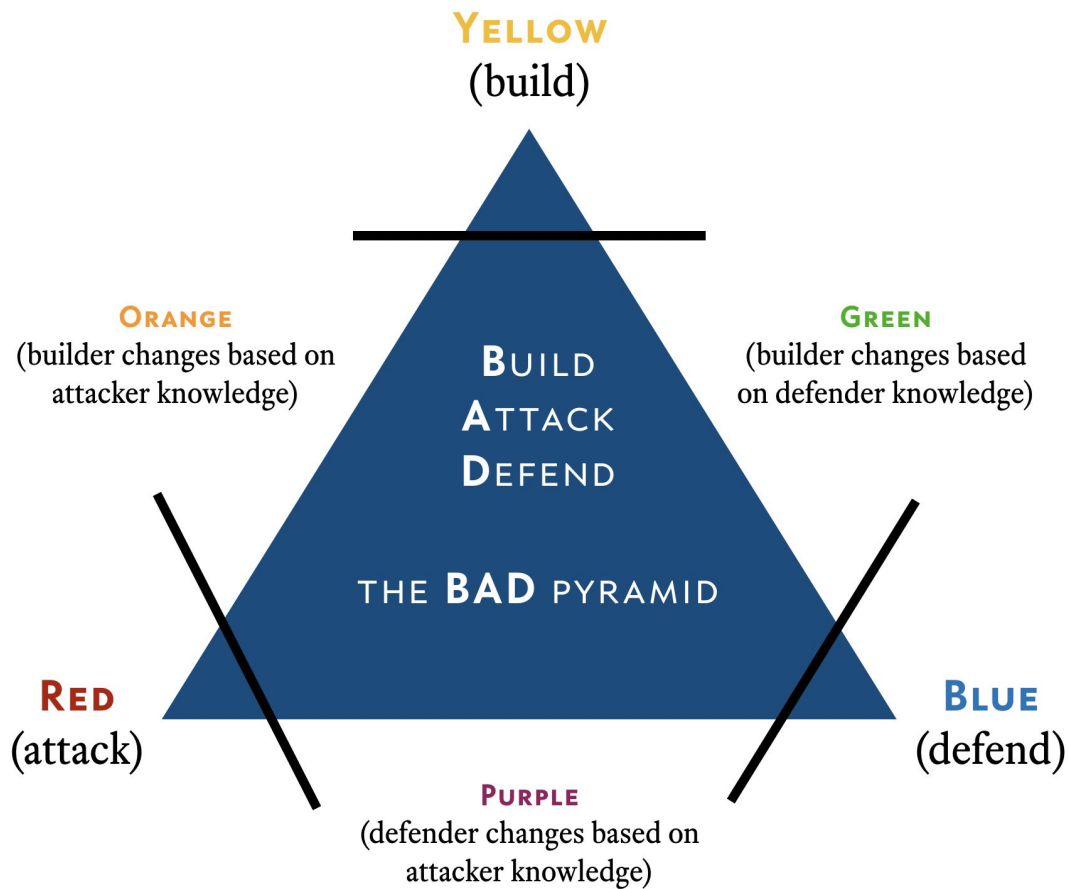

The “builders” have to get involved as well!

Theory: **“Yellow Builds it. Red Breaks it. Blue Defends it. Yellow Fixes it.”**

Practice: **“Yellow Builds it. Red Breaks it. Blue Complains about it. Yellow ignores it.”**

Ideal scenario: **“Yellow are educated with Red and work hand-in-hand with Blue.”**

DANIEL MIESSLER 2019

# NEW REALISATIONS

Even with these 3 teams defined, there were gaps and results not optimal. Only primary colours weren't enough!

Ideal scenario: **"Yellow are educated with Red and work hand-in-hand with Blue."** <- remember?

So we need to blend Red & Blue to form Purple!

**Enter, The Infosec Wheel!**
